Herd/Premises Management Plan Summary for Mitigating Novel Swine Enteric Coronavirus

Premises ID: ____________________________

Please check which of the following criteria pertain to the premises identified above:

Premises information
  Operation Type:
  ☐ Sow/Breeding  ☐ Nursery  ☐ Finisher  ☐ Farrow to Finish  ☐ Wean to Finish

  Inventory (optional but necessary for verification of biosecurity payment):
  ☐ >5,000  ☐ 2,000 to 4,999  ☐ 100 to 1,999  ☐ 1 to 99

☐ Biosecurity of visitors and vehicles entering or exiting the premises
  ☐ A communication/education plan is in place to inform visitors and service providers of disease status and biosecurity requirements
  ☐ Line of separation is in place for all visitors and service providers entering premises
  ☐ Protocols have been developed and implemented to contain and/or exclude the virus within the affected premises

☐ Biosecurity of employees entering or exiting the premises
  ☐ A communication/education plan is in place to inform employees of disease status and biosecurity requirements
  ☐ Line of separation is in place for all employees entering premises
  ☐ Protocols for employees have been developed and implemented to contain and/or exclude the virus within the affected premises
  ☐ Protocols for monitoring employee biosecurity compliance have been developed

☐ Periodic herd health observation
  ☐ Timely visits by veterinarian(s)
  ☐ Daily observations by producer/employees
  ☐ Monitoring of production records for health status changes
Livestock transport biosecurity
- Protocols have been developed and implemented pertaining to transport biosecurity to contain and/or exclude the virus within the affected premises
- Protocols have been developed for cleaning and/or disinfecting vehicles for certain animal movements (required for verification of biosecurity payments)
- Line of separation is in place for all animals and people entering and leaving premises
- Protocols for loading/unloading animals that attempts to minimize virus introduction have been developed and implemented

Cleaning and disinfection of facilities
- Protocols for pathogen reduction have been developed and implemented to reduce environmental viral load
- Use of an effective disinfectant (required for verification of biosecurity payments)
- Follow appropriate downtimes after cleaning and disinfection
- Where possible, use all-in and all-out production practices

Diagnostic testing to monitor status of the herd infection and assess efficacy of control strategies
- Protocols have been developed and implemented to establish stabilization and monitoring for the affected premises (monitoring may include submission of samples to a diagnostic laboratory for testing)

Maintenance of records on pig movement
- Movements of pigs on and off the premises have been recorded

All information and protocols are available upon request.
